# Make a Fluttering Butterfly

You will need:  drinking straw or stick, glue, scissors, colouring pens.

What to do:

1.  Colour both of the butterflies.  These will be either side of your fluttering butterfly.  You can make your own design or copy from a picture of a real butterfly.  Remember:  the wings of real butterflies have the same pattern and colour on both wings but may be different on their top and underneath.
2.  Carefully cut around the edge of your butterfly.  You may want to ask a grown-up to help you.
3.  Stick both sides of your butterfly to a straw so that the straw is sandwiched between them.  Add antennae and legs if you wish.
4.  Carefully bend the wings so that it looks like a flying butterfly.

And there you have it.  A colourful butterfly to flutter!
